

Archimedes (#5574)

AKA - Archie

Gentled by Intermountain Wild Horse & Burro Advisors, Inc. (IWHBA)

www.iwhba.org

Archie was named for the Greek mathematician because he is very calculating and only does something when he understands what is being asked of him. We are able to approach and halter him fairly easily in a large enclosure. He leads well but can get stuck when nervous. He can be groomed from head to tail, and has had all 4 feet trimmed. He loads himself in a 4 horse stock trailer and will unload forward or by backing out. Archie has also worn a saddle blanket and bareback pad. Archie will also stand tied. He is also extremely cuddly.
